**MANY THANKS TO EVERYBODY INVOLVED AND ESPECIALLY TO CARMEN FOR TAKING OVER THE EXPENSES FOR THIS DAY**

**WORLD SPAYDAY FEBRUARY 28th, 2014  
168 CATS NEUTERED: 65 MALE + 103 FEMALE**

A tom cat can mate with up to 300 females each year.  
Every mating results in a pregnancy.  
30 tom cats have been neutered in one single spay day.  
A female cat on average has 3 kittens per litter.

$$65 \times 300 \times 3 = 58.500 \text{ kittens}$$

A female cat can have up to 4 litters a year.

$$103 \times 4 \times 3 = 828 \text{ kittens}$$

**A SINGLE SPAY DAY AVOIDED THE BIRTH OF  
59.736 KITTENS IN THE FOLLOWING YEAR.  
MOST OF THEM WOULD HAVE DIED .....**

**PLEASE HELP US HELPING**

**THANKS A LOT
