The Mayor of Fiumicino inaugurates the new public veterinary surgery. Let's hope that many stray cats will be fixed here in future!

“SPAY WEEK” AT ROME/FIUMICINO 11-15/11/13

146 cats neutered (82 female and 64 male)

Vets at work in LEGA PRO ANIMALE's mobile clinic: left: Dorothea and Lorenzo, above: Glauco

Monia (vet) identifies the cats with a microchip and registers the data.

left: Dr. Lorenzo shows dr. Adriann our neuter technique
right: Dr. Adriann prepares a male cate for neutering

Maria (left) takes care of the cats after surgery. Julia (right) came especially for these days from Germany to coordinate everything and helps wherever help is needed.

Thanks to all the cat caretakers, the volunteers, the vets, to the Public Veterinary Services of ROMA D and to the town council of FIUMICINO. **IMPORTANT:** naturally we did not "treat" all the cats and if nobody continues to catch and spay/neuter the animals in this area, this single event was completely useless and the circle of birth/overpopulation/death of the cats and kittens goes on and on!

At Friday morning all the caretakers picked up the neutered cats to release them immediately. The staff of LEGA PRO ANIMALE puts the traps, the cages and all the equipment in the mobile clinic and the little truck to return to Castel Volturno.
